1 LAYERS DESIGNED BY NENDO

The Layers collection pushes the limits of technical manipulation of color, cut, and adhesion in glass. Featuring multiple hanging glass panels in the front, middle, and back, the layering of the translucent material produces a constantly changing chromatic experience. The technique to produce the panels consists of inserting colored film between two sheets of glass and applying heat to bond them together. luminaire.com/catalog/2968/

2 WOOD-MODE FINE CUSTOM CABINETRY

Wood-Mode's Vanguard Plus ribbon mahogany with horizontal grain match exudes a contemporary flair. Framed with a high intensity Hafele LED ribbon in a deep profile, this custom mirror solution creates a soft, but dramatic look. Additionally, the medium intensity Hafele LED ribbon beneath the vanity enhances its floating effect. The integrated lighting features streamlines daily use by providing convenient lighting in otherwise dim spaces. wood-mode.com

3 ENJOY MY RHYTHM, COFFEE TABLE

The 2 stacked trunks of pyramid aligned in a number of 4 separate units, this stunning whimsical ensemble can also be re-arranged to match the flow of any space. With such a great complexity of lines and surfaces and textures and concepts, this design also creates a simple yet delightful contrast of light: the black solid marble tone with those specific odd-gold insertions alternating with curious empty spaces! **Indira Lourenço, 917.336.8317, ilo.designcorp@gmail.com, ilo-designcorp.com**

4 CRANDON II SOFA

The Crandon II Sofa combines modern and chesterfield style for your living room with gray polyester upholstery, button tufted accents, and chrome steel legs. Three pillows are included as shown \$1,499. **305.624.2400, eldoradofurniture.com**
